Berkeley, Feb 18, 1923

My Dear Dr. Munz:-

Your very interesting package of specimens came to hand some days ago. I have named them as follows:-

No 6480 on Chlorogalum pomeridianum = I of Uvularia Chlorogali D. & H.
Arthur now considers this identical with U. Lili Clinton.

6481 " Arabis arcuata = Puccinia Holboellii (Hornem) Rostr.

5948 " Euphorbia albomarginata = I of Uromyces proeminens (DC) Pass

5482 " " Palmeri = Uromyces coördinatus Arthur.

6108 " Ribes Very immature but probably I of Cronartium occidentale

6182 " Juncus sp. = Uromyces Junci

5882 " Phlox austromontana = I of Puccinia plumbaria Peck

6089 " Pedicularis = Puccinia refescens D. & H.

6249 " Lupinus = Uromyces Lupini B. & C.

— " Scirpus arcuatus = Puccinia obtecta Peck

4718 (a former sending) on Vigueria deltoidea = Puccinia tragicoides Jackson

4720 (" ") on Bigelovia California was referred to Prof. Arthur. He pronounces it II of a new species of Coleosporium. He proposes (unless you prefer otherwise) to publish in the last part of his N A Flora Vol VIII which is soon to appear.

Sincerely yours W. C. Blasdale
